First Name: Roy **Last Name:** Schwartz **Account Name:** Roy Schwartz
Address: <<< REDACTED >>>
City: Tucson **State:** AZ **Zip Code:** 85749
Home: <<< REDACTED >>> **Email:** <<< REDACTED >>>

Company: Tucson Electric Power Company**Nature Of Opinion****Docket Position:** Against

I am a customer of TEP with an existing grid connected 6 KW DG system. I had the DG system installed in May 2015. Purchasing this system represented a substantial personal financial investment with a long term financial payback implications, which was an agreement between TEP and myself. It was my understanding that it helps TEP by offsetting additional investment to add fossil fuel based generating capacity, thereby helping air quality in Arizona. This is part of a national priority encouraged by both Federal and State governments. Changing this financial arrangement, diminishing the value of my DG system now would represent substantial financial hardship to me and discourage future investment in DG harming the environment. Also, this proposed change to metering would represent a huge step backwards for Arizona and the environment and a huge setback for the Arizona solar power generation industry. Arizona should be the national leader in solar power generation. It will be an embarrassment for the state if this proceeds. Just a terrible idea all around.
